**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner has reviewed the prior art in light of applicant's claimed invention and finds that the claims define over the prior art. The prior art does not disclose or suggest inter alia the limitations of a driver circuit for an optical source, the driver circuit comprising: at least an input stage and an output stage, the output stage being operatively coupled to the input stage; a current generator circuit adapted to establish a modulation current for application to one of a first output and a second output of the output stage in accordance with an input data signal applied to the input stage; and an output load detection circuit having first and second inputs coupled to the respective first and second outputs of the output stage, the output load detection circuit being configured to detect an improper load condition at one or more of the first and second outputs of the output stage and to generate a corresponding output indicator; the output indicator being utilizable in the driver circuit to control the modulation current so as to prevent saturation of at least one device in the output stage in the presence of the improper load condition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
